Odyssey Cubicles

With over 20 years experience in the washroom industry, Bridgewater recognised that a durable yet attractive washroom system was needed to cope with the demands of diverse commercial installations. This has culminated in the attractive, yet practical 'Odyssey' collection of washroom furniture.

We offer a stylish range of products, including cubicles, duct panel systems and vanity units, suitable for wet or dry areas. The 'Odyssey' ironmongery package is clean and contemporary in its design, and also offers a variety of safety features, which makes it ideal for low and high risk heavy use environments.

Each option is available in our standard range of moisture resistant melamine faced high density particle board or compact grade laminate.

'Odyssey' is suitable for large or small projects, from a singular cubicle to comprehensive washroom and changing facilities for a school or leisure centre.
